## Same Sounds 1

Here are some examples of words that have the same sound but different spellings and different meanings. After a lifetime of putting words down on paper, it does take some determination to stop the memory coming up with the normal spelling, which can override the phonetic outline, even though that outline is given in the book. Ignoring the spelling does get easier and is one of the reasons for always practising from the spoken sound, using only the material given in the book until it is finished, and never just transliterating from a printed passage. Some of the older books may say "write the following in shorthand", with the occasional advice to get a friend to read for you, but that was a time before iPhones and now there is no excuse not to record and write from that. You can do this as well with the shorthand passages, to get additional benefit from your reading practice.

There are more than enough longhand images in your mind trying\* to interfere with the shorthand writing\*, without adding to the difficulties by having longhand text before your eyes as well. This is like shooing the pigeons away whilst feeding them at the same time\*. Or maybe like the ducks and geese\* in my local park, if I hesitate and look at them, they will walk towards me, but if I keep straight on without deviating from my purpose, they don't bother either themselves or me.
